

My name is Johnny Giles and my company, Into-Reality LP, is the lead Consultant and Developer for JBC Corporation providing a wide range of advanced business services. The following information is provided for JBC Corporation to use and to substantiate the value of the sophisticated website and mobile app platform we are creating for them.

**Deliverables:**

1. Advanced native mobile apps for both Apple and Android ecosystems.
2. Interactive website, [jbc-corporation.com](http://jbc-corporation.com), offering shared resources, functionality, and seamless integration with the apps.
3. Bespoke software development, AI integration.

**Platform specifics:**

- Native Android/Apple mobile apps
- Web app using Vue.js framework, HTML, CSS.
- Node.js middleware
- MySQL RDBMS + PHP web services for data persistence
- AWS hosted backend services + frontend delivery mechanics

**Estimated Platform Value: \$3.5M - \$10M**

**Feature Specifics:**

The apps and website will provide up-to-date information on the operations of JBC Corporation, give Users useful tools and create interaction and networking opportunities. This will be a "performing" virtual asset with both hard asset and soft asset elements.

**Status as of May 2022:**

Alpha phase development with planned rapid migration to Google Play and Apple App Store. AWS environment procured for website, web services, and database hosting.
